

Theme: The Best Thing I Learned This Year

A Stepping Stone To Success

“Doctor, I can see the baby crowning, what do we do next?” the nurse inquires. “Hold your breath and push,” I say to the patient. Suddenly, the concrete counters and stools in the Chemistry lab jolt me into the reality that I am still in class. The miracle of birth is one which is a mystery to mankind. Though possessing the knowledge of how this is medically possible, persons are still amazed at this reality. My dream is to become a successful Obstetrician/ Gynaecologist in order to take a front seat role in this wonderful part of life. Cambridge exams and syllabuses help build a solid foundation that is essential to success. The challenging content enables me to prepare for future struggles that encompass medical studies. It is indeed astounding that Cambridge International Examinations can be such a useful stepping stone unto a field which I am very passionate about.
