

Title of writing: Time management

## **The best thing I learned this year**

The best thing I learned this year has to be time management. Students lead busy lives with enormous demands juggling homeworks, studying, researches, presentations and extracurricular activities. It was just a matter of time that work got backlogged, pressure piled on and the time I spent sleeping suddenly shrank!

I felt tired, disgruntled and most importantly, demotivated.

It was really about being efficient at work and so I had to manage my time.

I started making lists and noting down when everything was due. From there on, I was able to prioritise my work.

Time is a limited resource. We should feel the urge to cherish it as though it were precious gold, for after all "time is money". I took advantage of my education and personal development and learnt to use my time to achieve my goals. This experience has been immensely useful; it has definitely changed my life.

I state that this piece of creative writing is my own work and that I accept the rules of the competition.
