Cambridge Checkpoint

Resources List

What is Cambridge Checkpoint?

Cambridge Checkpoint is a diagnostic testing service designed to help students learn. The tests are available in:

- English
- Mathematics
- Science

Checkpoint Tests are specially designed for students who are beginning courses leading to IGCSE or O Level exams in these subjects.

Who can benefit from Checkpoint?

The main aim of Checkpoint is to help students learn which parts of the subject they are good at and which parts they need to make extra efforts in. If they make use of this information, it will help them achieve better results in the future.

As well as benefiting individual students, Checkpoint also helps schools. The reports provide the school with detailed information about the strengths and weaknesses of each class, as well as the school as a whole. Teachers can also use this information to focus their teaching on each class' particular needs, and to improve their teaching of future classes.

Who provides Checkpoint?

Checkpoint tests are provided by University of Cambridge International Examinations (CIE). CIE qualifications are taken in over 150 different countries and are recognised by universities, education providers and employers across the globe. CIE offers a wide range of academic and professional qualifications for all ages and abilities.

What resources are there to support Checkpoint?

The following pages provide a list of endorsed and suggested resources to support Cambridge Checkpoint. All books that have been endorsed by CIE have been through an independent quality assurance process and match closely the Curriculum Framework documents and schemes of work, which are published on the Teacher Support website.

CIE encourages teachers to choose texts for class use that they feel will be of interest to their students, appropriate to their students' ability and that will support their own teaching style.
